NEW BUSINESS

Non Pharmacist Dispensing –

Ms. Robbins expressed concerns regarding urgent care and other facilities that are either not reporting to the Prescription Monitoring Program (PMP) or are not required to report. This is of concern regarding contraindications of medications that can occur and cannot be caught by a pharmacist. Dispensing of medications by practitioners, urgent care clinics and others should be required to check the PMP and follow proper labeling requirements. The Board of Medical Licensure and Discipline statute requires practitioners to follow proper labeling of dispensed medications with the exception of an Rx number. Mr. Dryden stated that if a pharmacist experiences labeling issues on dispensed medications they should get all of the pertinent

practitioner contact information, a copy of the label and the pharmacist should file a formal complaint with the Division of Professional Regulation. Ms. Robbins also stated that practitioners who are dispensing non controlled substances and writing prescriptions for controlled substances to be filled at a pharmacy creates a problem for pharmacies due to accountability of the non-controlled substances versus 12 percent of controlled substances a pharmacy dispenses.

Addition of Agenda Items for Discussion –

The committee requested that the following items be added for discussion the next meeting of the committee.

- Telemedicine
- Delaware Health Information Network(DHIN) Pharmacist, Clinical Practitioner Status
- Veterinary Compounding
